Identificación de requisitos.

| Requisito Funcional | Definición |
|-------------------------------------|---|
| Poder registrarse | Que el usuario pueda registrarse introduciendo nombre de usuario y contraseña. |
| Iniciar sesión | Que el usuario pueda iniciar sesión introduciendo nombre de usuario y contraseña. |
| Almacenar estadísticas de preguntas | Almacenar información sobre qué usuarios han jugado, cuántas preguntas han acertado, qué preguntas son las más difíciles, etc. |
| Posibilidad de ganar quesitos | Si jugador acierta una pregunta de una determinada categoría, se le asigna el quesito del color correspondiente y puede continuar. |
| Posibilidad de ganar la partida | Si el jugador que tenga los quesitos de todos los colores podrá ir a la última casilla. Si acierta la pregunta de dicha casilla finaliza el juego como ganador. |

| Requisito no funcional | Definición |
|--------------------------------------|---|
| Diferentes representaciones visuales | Separarse claramente la visualización del juego del resto de funcionalidad como de la interacción con el usuario o el funcionamiento del juego. |
| Multiplataforma | Que el juego funcione en el futuro en diferentes plataformas (ordenadores de escritorio con diferentes sistemas operativos, dispositivos móviles, etc.) |

Identificación de Stakeholders.

A continuación se describen los stakeholders identificados en el sistema, para la determinar sus objetivos se ha usado la metodología de diseño por interacción.

| Código | Stakeholder | Intereses |
|--------|---|--|
| ST-01 | Usuarios: Con privilegios (administrador) | Obtener información sobre qué usuarios han jugado, Cuántas preguntas han acertado Qué preguntas son las más difíciles, etc |
| ST-02 | Usuarios: Sin ellos (usuario normal) | Saber si acierta la pregunta Saber cuántos quesitos tiene Saber cuándo gana el juego |
| ST-03 | Desarrolladores | Realizar una aplicación mantenible con objeto de facilitar la modificación de funcionalidad en caso de que la empresa lo solicite. Proyecto rentable, esto es, que permita ser desarrollado por el precio establecido con un grado de rentabilidad que haga atractivo el desarrollo |
| ST-04 | Miembros de la compañía | Almacenar información sobre los jugadores Está muy interesada en la utilización del juego como herramienta de aprendizaje Que el juego funcione en el futuro en diferentes plataformas Desea que pueda separarse claramente la visualización del juego del resto de funcionalidad |

Identificación de Atributos de calidad.

| Código | Descripción | Tipo de Atributo |
|--------|--|------------------|
| AT001 | Número de jugadores | Usabilidad |
| AT002 | Disponibilidad 24/7 | Disponibilidad |
| AT003 | Estadísticas de cada jugador | Usabilidad |
| AT004 | Cambio de plataforma | Adaptabilidad |
| AT005 | Desacoplamiento de la vista de negocio | Modificabilidad |
| AT006 | Usuario puede modificar el aspecto | Usabilidad |
